LESSON PLAN

UNDERSTANDING AND USING PRIMARY AND SECONDARY SOURCES
Social Studies, Grades 6–8

OBJECTIVE
According to the Library of Congress, “primary sources provide a window into the past—unfiltered access to the record of artistic, social, scientific and political thought and achievement during the specific period under study, produced by people who lived during that period” (Library of Congress). Primary sources can also “bring people into close contact with unique, often profoundly personal, documents and objects” that give them a better sense of the past, as well as a closer connection to it. Students practicing primary source analysis learn to think like historians, constructing theories supported by facts.

Using primary and secondary source audiovisual material, students will analyze and compare varied Texas and U.S. history topics of the 19th and 20th century, and develop analytical and critical thinking and viewing skills, identifying the strengths and limitations of varied historical resources. This lesson highlights the contributions of significant individuals, including U.S. Representative Barbara Jordan, President Lyndon Baines Johnson, Mary Kay Ash, and the infamous outlaws Bonnie and Clyde. It also highlights important topics such the Texas Alamo, the Galveston Hurricane of 1900, the King Ranch, and the assassination of President John F. Kennedy. Students will better understand important historical topics and the differences between secondary and primary sources in this lesson.

PROCESS
Prior Knowledge
Students should have knowledge of the following areas to successfully take part in this activity:

- The following activity assumes students know that history is multifaceted and based on facts and available records.
- Students should know that records are used to explain the past and can differ with one another.
- Students should be able to give a few examples of historical sources.
- Students should be able to look at their classroom textbooks’ indexes or work cited pages to identify the different resources used in the textbook.
- Students should be somewhat aware of the differences between a primary and secondary source.
LESSON PLAN

Hook

Play this short film for your students.

“Primary and Secondary Sources”
by Rob Redman
https://www.texasarchive.org/2014_03977

After watching the short film, give each student a note card. Instruct them to draw a T chart on it and write “primary sources” on the left and “secondary sources” on the right. Next, have students anonymously list 3-4 examples of each type of source. Collect their notes and review their comprehension. See if any gave examples that were not mentioned in the video. Read aloud the students’ responses and discuss the basic differences between primary and secondary source examples.

On another note card, have students write down their own definitions of a primary and secondary source. Collect them and assess students’ comprehension. As a class, discuss the differences between the two definitions.

As a class, write the best comprehensive definitions of primary and secondary sources on the board; be sure to include examples from students’ prior examples. Students should now have a basic understanding of the two sources at this point.

Lesson

approx. 90 - 120 minutes

As a preview for the lesson, have students think how videos and film can be also be primary or secondary sources. Ask students to give some examples of film sources.

Divide students into small groups (3-4 students per group). Assign groups a topic (listed below). As a group, students will research and analyze their topic(s) using a variety of assigned primary and secondary source film and video from texasarchive.org.

Group Topics:

- The Alamo
- U.S. Representative Barbara Jordan
- Bonnie & Clyde
- The Galveston Hurricane of 1900
- The King Ranch
- President JFK’s Assassination

©Texas Archive of the Moving Image
texasarchive.org
LESSON PLAN

- President Lyndon Baines Johnson
- Mary Kay Ash

Depending on your classroom set up, students may rotate around the room to various stations researching topics using their textbooks and classroom computers. Or you can have them do their research in the classroom using their textbooks first, and then you can take them all to the computer lab to work on the primary and secondary film viewing portion.

Have students start by researching their topics using their textbooks (secondary source) to become familiar with the basic knowledge of the event or person. Have students use the following worksheet (PDF) as a group to record their 10 facts. Make 4-5 copies of the worksheet’s page 2, the film charts, for groups when using the computer for research. Have students refer to the primary and secondary source guide as they analyze the films. They will answer the following questions about their topic’s sources:

- Why would a historian question the evidence or claims presented in this video?
- What evidence presented in this video can be used to support the claims of the creator or subject of the video?
- Do the videos try to present the creator or subject as average or exceptional? Why?
- What is the context of this video? Why would the films’ creators choose to create this particular video at this particular time?
- What other information might be needed to determine the accuracy of the video?

After students have completed their worksheet, researched their topic using the textbook or encyclopedia, viewed the primary and secondary source films assigned to them, and recorded their observations and thoughts, they can now “report out” as a group what they learned. This will be a short classroom presentation in which all members will participate.

Groups will present their historical person or event to the class. This should be a short (less than 10 minute presentation) for each group. They will discuss what they learned about the topic from the primary and secondary sources, and will comment on what was most different about the primary and secondary sources. Make sure students expand on what the book says about their topic based upon the different sources. Have them play short scenes of a primary and a secondary source to the class to demonstrate their differences.
Independent Practice

After students have presented their topics to the class, have them take out some notebook paper and record a daily journal entry (their own primary source). Have students write down the date and time at the top of their paper. Then have them describe themselves at this moment. They are documenting their own histories today. Have them address what their interests are, their goals for the future, and their favorite things. Tell them that you will seal these up at the end of class and reopen them at the end of the year. They will get to read about their goals, hobbies, and interests from this specific moment and reflect upon how they changed. This is a personal, fun way to get students to record their own histories, creating primary sources of their own that they can reflect upon later in the year. Follow up: When they read these at the end of the year, you could have them analyze their personal histories (primary source) and create a secondary source synopsis of their primary source personal history.

Extended Learning

Now that students understand their topics thoroughly, have them create their own encyclopedia or textbook entries for that topic. Have students write a 1 page description explaining their topic, combining what they learned and observed from both the primary and secondary source material. Have students correctly cite where they learned a particular fact in their paper (work cited page). Collect these accounts to read and assess student’s understanding of primary and secondary sources and their topics as an individual grade.

TEKS

Social Studies, Grade 6

2A – Explain the significance of individuals or groups from selected societies, past and present

2B – Describe the influence of individual and group achievement on selected historical or contemporary societies

7A – Identify and analyze ways people have adapted to the physical environment in selected places and regions
LESSON PLAN

8B – Identify and differentiate among traditional, market, and command economies in selected contemporary societies, including the benefits of the U.S. free enterprise system

18B – Relate ways in which contemporary expressions of culture have been influenced by the past

21A – Differentiate between, locate, and use primary and secondary sources such as computer software; interviews; biographies; oral, print, and visual material; and artifacts to acquire information about selected world cultures

21B – Analyze information by sequencing, categorizing, identifying cause-and-effect relationships, comparing, contrasting, finding the main idea, summarizing, making generalizations and predictions, and drawing inferences and conclusions

21C – Organize and interpret information from outlines, reports, databases, and visuals including graphs, timelines, and maps

21D – Identify different points of view about an issue or topic

21E – Identify the elements of frame of reference that influenced participants in an event

22A – Use social studies terminology correctly

22B – Incorporate main and supporting ideas in verbal and written communication

22C – Express ideas orally based on research and experiences

22D – Create written and visual material such as journal entries, reports, graphic organizers, outlines, and bibliographies

22E – Use standard grammar, spelling, sentence structure, and punctuation

Grade 7

1B - Apply absolute and relative chronology through the sequencing of significant individuals, events, and time periods

1C – Explain the significance of the following dates: 1519, 1718, 1821, 1836, 1845, and 1861

2E – Trace the development of events that led to the Texas Revolution, including the Law of April 6, 1830, the Turtle Bayou Resolutions, and the arrest of Stephen F. Austin

3A – Explain the roles played by significant individuals during the Texas Revolution, including George Childress, Lorenzo de Zavala, James Fannin, Sam Houston, Antonio López de Santa Anna, and William B. Travis
LESSON PLAN

7A – Define the impact of "boom and bust" and trace the boom-and-bust cycle of leading Texas industries throughout the 20th century, including farming, oil and gas, cotton, cattle ranching, real estate, and banking

9C – Analyze the effects of physical and human factors such as climate, weather, landforms, irrigation, transportation, and communication on major events in Texas

10A – Identify ways in which Texans have adapted to and modified the environment and analyze the consequences of the modifications

12C – Explain the changes in the types of jobs and occupations that have resulted from the urbanization of Texas

13B – Analyze the impact of economic phenomena within the free enterprise system such as supply and demand, profit, government regulation, and world competition on the economy of Texas

Texas

17B – Describe the importance of free speech and press in a democratic society

17C – Express and defend a point of view on an issue of historical or contemporary interest in Texas

18A – Identify the leadership qualities of elected and appointed leaders of Texas, past and present, including Texans who have been President of the United States

18B – Analyze the contributions of Texas leaders such as Henry B. González, Phil Gramm, Barbara Jordan, and Sam Rayburn

19C – Identify examples of Spanish influence on place names such as Amarillo and Río Grande and on vocabulary in Texas, including words that originated from the Spanish cattle industry

21A – Differentiate between, locate, and use primary and secondary sources, such as computer software, databases, media and news services, biographies, interviews, and artifacts to acquire information about Texas

21B – Analyze information by sequencing, categorizing, identifying cause-and-effect relationships, comparing, contrasting, finding the main idea, summarizing, making generalizations and predictions, and drawing inferences and conclusions

21C – Organize and interpret information from outlines, reports, databases, and visuals including graphs, charts, timelines, and maps

21D – Identify points of view from the historical context surrounding an event and the frame of reference that influenced the participants

21E – Support a point of view on a social studies issue or event
LESSON PLAN

21F – Identify bias in written, oral, and visual material

21G – Evaluate the validity of a source based on language, corroboration with other sources, and information about the author

22A – Use social studies terminology correctly

22B – Use standard grammar, spelling, sentence structure, and punctuation

22C – Transfer information from one medium to another, including written to visual and statistical to written or visual, using computer software as appropriate

22D – Create written, oral, and visual presentations of social studies information

Grade 8

1B – Apply absolute and relative chronology through the sequencing of significant individuals, events, and time periods

10C – Analyze the effects of physical and human geographic factors on major historical and contemporary events in the United States

27D – Explain how technological innovations brought about economic growth such as how the factory system contributed to rapid industrialization and the Transcontinental Railroad led to the opening of the west

29A – Differentiate between, locate, and use valid primary and secondary sources such as computer software, databases, media and news services, biographies, interviews, and artifacts to acquire information about the United States

29B – Analyze information by sequencing, categorizing, identifying cause-and-effect relationships, comparing, contrasting, finding the main idea, summarizing, making generalizations and predictions, and drawing inferences and conclusions

29C – Organize and interpret information from outlines, reports, databases, and visuals, including graphs, charts, timelines, and maps

29D – Identify points of view from the historical context surrounding an event and the frame of reference which influenced the participants

29E – Support a point of view on a social studies issue or event

29F – Identify bias in written, oral, and visual material

29G – Evaluate the validity of a source based on language, corroboration with other sources, and information about the author

30A – Use social studies terminology correctly
LESSON PLAN

30B – Use standard grammar, spelling, sentence structure, punctuation, and proper citation of sources

30C – Transfer information from one medium to another, including written to visual and statistical to written or visual, using computer software as appropriate

30D - Create written, oral, and visual presentations of social studies information
